

PAIDEIA CLASSICAL ACADEMY

Increased Safety Attributes for the 2020-2021 school year, with a focus on maintaining traditional, on campus classes:

- Fully compliant with all local and state applicable regulations¹;
- Zero tolerance stay-home-if-sick policy (but easy to counter the possibly negative effects due to falling on a personalized, full-teacher and live classes access, hybrid program in such a situation);
- Highly increased sanitation;
- Focusing on teaching the students proper sanitary procedures, creating a culture of knowledgeable, vested behavior;
- Direct, temperature-checked drop-off and pick-up to/from each homeroom, instead of school-wide drop-off;
- Outdoor classes to the extent permitted by Florida weather; indoor air-scrubbing and social distancing.

¹ This is a situation changing every day, therefore we will update this document as local applicable guidelines and legislation are being modified and released, closer to the beginning of the school year. We are currently fitting our school with different sanitation solutions, meant to increase the health safety of our students and staff.
